

Transform Care, Boost Revenue: Remote Patient Monitoring for Health Centers

Empowering health centers to improve patient outcomes while generating new revenue, all with a flexible, budget-friendly RPM solution tailored to your needs

Proven Results: VNA Health Care Success Story

VNA Health Care in suburban Chicago utilized CareSimple's RPM platform to manage its high-risk diabetic patients.

By using cellular-connected glucometers, they reduced A1C levels, improved glucose control, and generated new revenue through RPM reimbursement.

Outcome: Improved patient adherence, reduced ER visits, and generated a new stream of RPM-related revenue within six months.

Next Step: VNA is now expanding their program to manage their hypertensive patients using CareSimple's BP monitors.

Key Benefits for Health Centers

Maximize Reimbursement Potential

CareSimple's platform is designed to help you unlock new revenue streams through Medicare and Medicaid reimbursement, making RPM not just beneficial for patients but also a financial asset for your clinic.

Automated Billing Support: Capture Medicare/Medicaid reimbursement without the paperwork headaches.

Revenue Growth: Health centers using CareSimple generated a new stream of RPM-related revenue within six months.

Budget Flexibility

CareSimple's remote patient monitoring (RPM) services are designed to fit the unique needs of health centers and FQHCs. Choose between a self-managed (technology only) or a fully-managed (technology + care management services) or a perfect balance between the two.

Pre-negotiated Pricing: Sharing risk pricing available

Commitment Discounts: Commitment-based incentives as a CHCollective member

Simple Logistics

Our devices come equipped with cellular connectivity, eliminating the need for patient setup or Wi-Fi. We handle all logistics—whether shipping to patients' homes or points of care—ensuring RPM works for all patients, regardless of their tech skills or home setup.

Drop-Ship Devices: Shipped directly to patients' homes, fully connected.

Reliable Cellular Connectivity: No Wi-Fi needed for real-time monitoring.

Seamless EHR Integration

CareSimple's RPM integrates with your existing EHR, letting care teams monitor patient data directly within their usual workflows. Real-time alerts help your team respond quickly when patients' conditions worsen, improving outcomes and streamlining care.

Easy Integration: Works with Epic, Cerner, and more.

Real-Time Alerts: Care teams can take immediate action on critical data.

Clinical and Technical Support at Every Step

Our nurse-led support team provides onboarding assistance, troubleshooting, and proactive outreach to keep patients engaged, taking the burden off your team while ensuring patients stay on track.

Nurse-Led Support: Full onboarding and troubleshooting for patients.

Proactive Engagement: Regular follow-ups to ensure patients stay engaged.

Ready to Maximize your RPM Potential?

CareSimple helps you grow your RPM program, improve patient outcomes, and generate new revenue without adding extra workload to your staff.
