

THE 553KL

DIGITAL PEDIATRIC SCALE WITH EXTRA-WIDE TRAY

The 553KL pediatric scale was specifically created for nurseries, delivery rooms, and pediatric practices, making it an ideal choice for newborns, infants, and toddlers. With a maximum capacity of 44 pounds and 20 kilograms, this scale offers providers and patients a range of benefits, including safety, comfort, and flexibility. The scale ensures a secure platform, keeps patients calm for accurate readings, and accommodates infants lying down to toddlers sitting up.

The 553KL pediatric scale offers a built-in measuring tape, allowing users to measure weight and height simultaneously. It also provides the flexibility of choosing between an optional digital or mechanical height rod. For easy portability and storage, there is an optional carrying case.

With its user-friendly digital interface, the 553KL scale includes features such as Zero, Tare, Pre-Tare, Hold/Release, Reweigh, and Auto-off, making it convenient and easy to use. Its motion detection technology ensures accurate weight measurements even when the patient moves.

The 553KL provides easy integration and seamless communication with today's EMR applications with the option to incorporate wireless connectivity for interfacing with computers, EMR software, or other electronic devices.

553KL-EHR

Scale with attachable digital height rod

THERE'S STRENGTH IN OUR NUMBERS.

When you add up the numbers on our scale, it's not surprising that the 553KL is your choice for safety, comfort, and reliability.
